ENCLOSED STAIRS, DIRECT HOME ENTRY

9.00 x 17.00 m footprint | 95 m² house block + 21.5 m² enclosed stair / lobby | 36.5 m² open terrace

CONCEPT ONLY / Dimensions in metres / Front at bottom, garden at top / Side walls have no windows

01 GROUND FLOOR

GROUND FLOOR

153 m² gross footprint

Rental warehouse + WC

Private garage at front right

Stair behind the garage

Home access through garage

No access through rental area

WINDOWS

Front and rear only.

STAIR ASSUMPTION

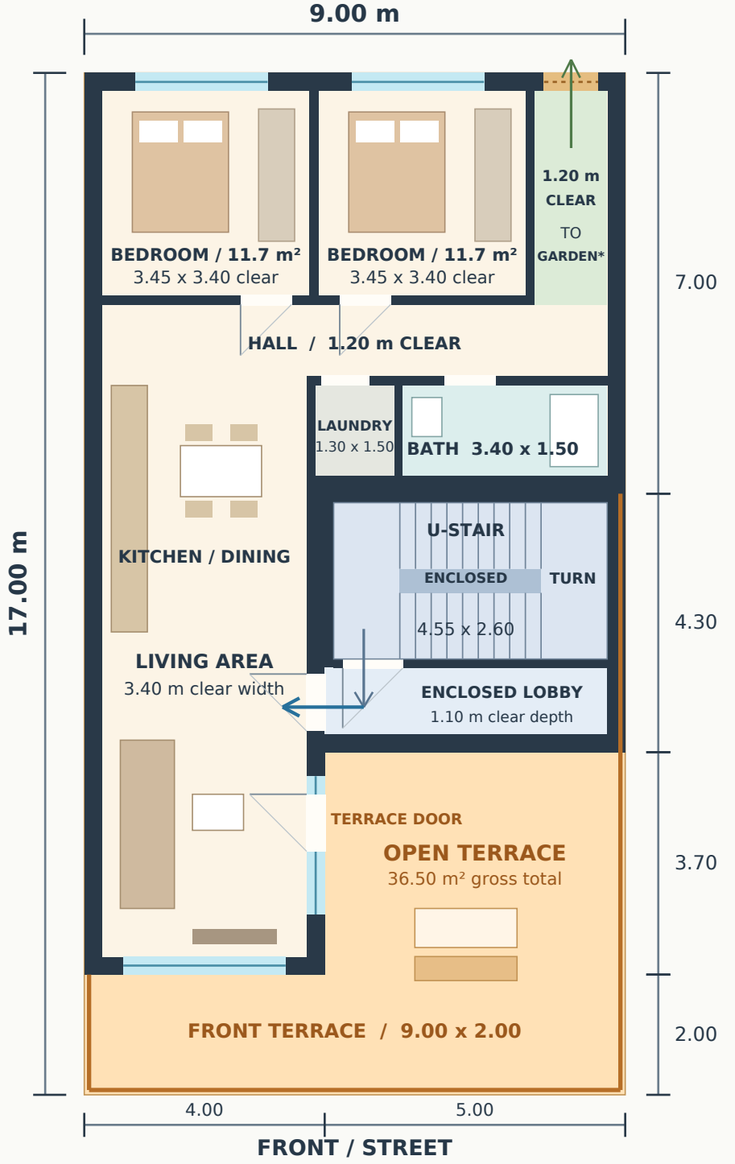

Approx. 1.10 m flight width.

Enclosed and roofed upstairs.

Final rise and headroom

need coordinated design.

02 UPPER FLOOR

AREA CHECK

Original house block: 95 m²

Stair / lobby: 5 x 4.3 m

Added enclosure: 21.5 m²

ENCLOSED TOTAL: 116.5 m²

OPEN TERRACE: 36.5 m²

116.5 + 36.5 = 153 m²

Gross areas include walls.

Terrace before railings/curbs.

HOUSE + GARDEN ACCESS

95 m² original block retained.

Stair / lobby additional;

Right passage: 1.20 m clear.

Two bedrooms: ~11.7 m² each.

*Rear exit is provisional.

External landing / stair needed

if garden is at ground level.

DESIGN BASIS / READ BEFORE USING THIS SKETCH

Indoor route: garage > enclosed stair > roofed lobby > living room. The living room has a separate door to the open terrace.

Enclosure added above the garage: 5.00 x 4.30 = 21.50 m² gross. Main house dimensions and the ground-floor layout are retained.

Width check: 0.30 + 3.45 + 0.15 + 3.45 + 0.15 + 1.20 + 0.30 = 9.00 m. Two exact 3.50 m rooms would require 9.10 m.

New enclosure is conceptual: verify roof, structural support, headroom, ventilation and fire separation from garage / rental storage.

Rear garden exit is reserved only: no usable exit until levels, an external landing/stair and boundary clearances are verified.

The cadastral plot narrows: a 9 m building width, boundary clearances and planning approval are NOT verified by this drawing.
